2021-2022 Program Level Assessment: Annual Report

ProgtA-." ™R Àb h It Ò "" @ •!}2(sr Fg" 'n3 DJL• -• B Fd À .Departíment:

PLO #2: Th<u>Screening/assessment Activityasreviewedby MRI faculty utilizing a rubric for the assignment Activityasreviewedby MRI faculty utilizing a rubric for the assignment explored for the Assignm</u>

PLO #3:Critical reflectionswere assessed by program faculty utilizing a rubric for the assign faculty are reflection instructions were edited for this year with scheduled topics. The topics included "Cura Personalis, ethics, and professionalism.

PLO #4: The Capstone Papperscritiqued by program faculty for content and format following prescribed parameters and the program assessment plan rubine Capstone presentations were critiqued program faculty members and MRI Advisory Board members content and format following prescribed parameters (Appendix) and the program assessment plan rubric

Committee shares information and seeks resolutions for issues with clinical practicum and is a great reso for information sharing.

B. How specifically have you decided to us besefindings to improve teaching and learning in your program of the sample, perhaps you've initiated one or more of the following

Changes to the	Course content
Curriculumor	Teaching techniques
Pedagogies	Tc 0 Tw 25.587 02.542

IMPORTANT:*

Please submit any assessment tools (e.g., artifact prompts, rubrics) with this report as separate attachments or copied and pasted into this Word document. Please do not just refer to the assessment plan; the report should serve as a stand-alone document.

For DCHS Programs

If you choose to copy/paste items from the list above * and those below^, c learly label them within the Word document.

 29.
 Follows isolation protocols

 30.
 Checks for metallic or ferromagnetic objects before entering MR suite

 TOTAL/30 = _____ AVERAGE SCORE

Mid Rotation Evaluation

(circle one)

1.	The student understands the objectives of the rotation.	Y	Ν
2.	The student's understanding of exams coincides with the level of the rotation.	Y	Ν
3.	The student is actively pursing the requirements to complete the rotation.	Y	Ν
4.	The student is displaying motivation in per		

2021-2022 Doisy College of Health Sciences -Program-Level Annual Assessment Report |updated 05/19/2022

will result in a decrease of the student's clinical grade.

Prompts for each critical reflection

Rotation 1: Due 2/6/2022

Jesuit Values What are Jesuit Values? How have you seen "Cura Personalis" reflected in the clinical setting?

Rotation 2: Due 4/3/2022

Professional characteristics of a MRI technologist Provide examples of portrayal (good and bad) of the professional characteristics mentioned in your reflection.

Rotation 3: Due 5/24/2022

Ethical Dilemma

Have you witnessed an ethical dilemma or been involved in one personally during your time in the clinic? If not, please provide thoughtful comments on what good and bad ethics may be and how they would affect the profession and or others.

Rotation 4: Due 7/18/2022

Professional Development

Describe your progress as an MRI technologist. Think back to the first rotation and how you felt and compare to the fourth rotation as you are completing the program.

Entries are NOT to be written during clinical time.

*Note on scoring methodology: Grade on criteria as indicated below, from 1 to 5. Please use whole numbers.

5 = Excellent 4 = Very Good 3 = Average 2 = Below Average 1 = Poor

Evaluation categories below are listed in descending merit: 5 is highest, 1 is lowest.

A. Project, global:

- 5 Project was a basic or primary scientific analysis of a subject important to MRI performed using background, hypothesis, methods, data acquisition, analysis, discussion, conclusion
- 4 Project involved data gathering or surveys and involved analysis, but lacked one or more of background, hypothesis, methods, data acquisition, analysis, discussion, conclusion
- 3 Subject examined in only a descriptive manner, but discussed new methods or materials AND subject is relevant to MRI
- 2 Subject was a review of previous material familiar to the audience
- 1 Subject had little relevance to MRI and is of little merit

B. <u>Content:</u>

- 5 Excellent scientific paper, student demonstrates good understanding of MRI science. Has background, hypothesis/premise, methods, results, analysis, conclusion, all with good merit
- 4 Project reflects an understanding of science of MRI, has a good knowledge of the subject, presentation has hypothesis (or premise), methods, results, analysis, conclusion
- 3 Project shows some understanding of subject matter relevant to MRI, but only average in respect to methods, results, analysis, conclusion
- 2 Project has minimal relationship to MRI science, had minimal discussion or analysis hence, minimal understanding of subject matter
- 1 No discernable science presented, little understanding of MRI science, little or no discussion or analysis or rational conclusion

C. <u>Scientific Merit</u>

- 5 Project is of significant scientific merit and worthy of outside presentation or submission for publication
- 4 Project shows good merit, but lacks in complete novelty
- 3 Project demonstrates some originality and attempt at discovery, but somewhat lacks in its achievement due to effort or complexity of subject
- 2 Project was a good idea at the start, but failed to achieve its goals and better luck next time
- 1 Project unoriginal, generally plagiarized, lacking rational thought and best kept in a locked file

D. Preparation and Presentation

- 5 Student is well prepared and understands the subject matter; presentation is well-designed with no errors
 - 4 Student is prepared but presentation is weak, i.e. rushed, too jocular, spelling errors
 - 3 Student is only somewhat prepared and presentation is faulty (slides out of order, computer problems)
 - 2 Presentation is marginal, subject matter obscure, images not relevant, audience restless and confused
 - 1 Presentation put together with minimal effort, material uncoordinated, slides show unorganized
