4. Data/Results

What were the results of the assessment of the arning outcom(s)? Please be specifico be achievement differry teaching modality(e.g., online vs. factor face) or on-ground location (e.g., STL campus, Madrid campus, other off campus site?)

Outcome #3:

5080 (appendix O): 00% of students achieved a grade greater than B or better on their pharmacological principles

relationships with patients and interprofessional teams. CNL certification shows

publication. The CNL competencies are currently under the distribution of the term of term

7. Closing the Loop: Review of PrevioAssessment Findings and Changes

A. What is at leasone change youprogramhas implemented in recent years as a result of assessment data? After assessing the ISN CN program outcomes and reviewing new AACN Essential guidelines, the MSN C program made œurricularchangein Fall 2022 that was implemented Jan 2022 Bis change involved increasing the number of program clinical hours and increasing the CNL specific competencies exposure. The faculty felt that a CNL specific role course was needed at the beginning of the program. Therefore, Epidemiology was replaced by 50 R 6 le Acquisition for the Clinical Nurse Leader and an additional 75 clinical hours that focus on the roles of the CNL were added to our program c Tange
